Preface

The secondary curriculum has been revised in the light of National Education Policy 2010, which emphasises learning English as an international language for communicating locally and globally. The 'English For Today' textbooks have been developed to help students attain competency in all four language skills, i.e. listening, speaking, reading and writing.

The development of curriculum, syllabus and textbook is a continuous process. In continuation of it, this book has been developed and rationally evaluated by a group of experts, which included curriculum specialists, subject specialists, teacher trainers and classroom teachers. The contents and illustrations of this book have been developed in order to suit the learners' age and cognitive level. In this book effective communicative approach and techniques integrated with existing traditional methods have been introduced. The book emphasizes practicing language skills through a variety of meaningful and enjoyable activities.

The publication of teacher's guide is under process. The teacher's guide will help the teachers to plan the lessons more effectively and teach the students communicatively through teaching learning activities.

My heartfelt gratitude goes to the curriculum developers, writers, illustrators and coordinator who worked under tremendous time constraints. Without their sincerity, commitment and hard work, it would not have been possible for NCTB to develop the English textbook 'English For Today', making it available to teachers and students all over the country by January 2013. As the textbook was developed within a very limited time, there is room for further development. Attempts have been made to make the book free from errors as far as possible. Any constructive suggestions for the improvement of the textbook will be welcomed and incorporated in future editions.

I also sincerely thank all involved in the production and publication of this textbook. If this book is used properly, the textbook will no doubt facilitate learning English at the desired level.

Lesson 1: At the airport

Key words: lounge immigration

A Look at the picture and talk about it.

- 1 What do you see?
- 2 Can you guess where it could be?
- 3 Who are the people in the picture?
- 4 What could be their relationship?

B Now read the text and find out if your guesses are correct.

Zara lives with her parents in London. They have come to Bangladesh to visit Zara's aunt and uncle. She is very close to her cousin Mita. Both the families have visited many interesting places together in Bangladesh. It was a great fun. Then they decided that they would visit some places outside Bangladesh too. They decided to go to Thailand. But Mita's parents were too busy with their work, so they could not go. However, Mita was going with them.

Mita, Zara and her parents are at Hajrat Shahjalal International Airport. They are waiting in the lounge. Mita is very excited. This is her first time to board a plane. They are flying by Bangladesh Biman. Mita is hoping to have a great time in Thailand.

As they wait, the two cousins start planning what they would do once they reach Bangkok. Mita’s uncle brings forms for all of them to fill in before going through the immigration. He gives one to Mita and says, “You have to give some information about yourself in the form. The immigration officer will check your passport and stamp it. And then you are ready to travel.” Mita, Zara and her parents start filling in the forms.

C Read the text again and answer the following questions.

- 1 Why is Mita excited?
- 2 Why aren’t Mita’s parents going with her?
- 3 What does an immigration officer do at the airport?

D Write a short composition about your experience of travelling to another place. It could be going to your grandparents’/aunt’s/sister’s/brother’s house.

Write about your preparation before travelling, your experience on the way, e.g. launch terminal, railway/bus station, airport, etc.

Oxygen and the air pressure are always being monitored. In the event of a lack of oxygen, an oxygen mask will automatically appear in front of you. Pull the mask towards you and place it firmly over your nose and mouth. Secure the elastic band behind your head, and breathe normally. If you are travelling with a child or someone who requires assistance, secure your mask on first, and then assist the other person. Keep your mask on until a uniformed crew member advises you to remove it.

In the event of an emergency, please assume the bracing position. That is, lean forward with your hands on top of your head and your elbows against your thighs. Ensure your feet are flat on the floor.

A life vest is located in a pouch under your seat or between the armrests. When instructed to do so, open the plastic pouch and remove the vest. Slip it over your head. Pass the straps around your waist and adjust at the front. To inflate the vest, pull firmly on the red cord, before you leave the aircraft. We remind you that this is a nonsmoking flight.

You will find this and all the other safety information in the card located in the seat pocket in front of you. We strongly suggest you read it before takeoff. If you have any questions, please don't hesitate to ask one of our crew members. We wish you all an enjoyable flight.

Ode on Solitude

Happy the man, whose wish and care
A few paternal acres bound,
Content to breathe his native air,
In his own ground.
Whose herds with milk, whose fields with bread,
Whose flocks supply him with attire,
Whose trees in summer yield him shade,
In winter fire.

Blest! who can unconcern'dly find
Hours, days and years slide soft away,
In health of body, peace of mind,
Quiet by day,

Sound sleep by night; study and ease
Together mix'd; sweet recreation,
And innocence, which most does please,
With meditation.

Thus let me live, unseen, unknown;
Thus unlamented let me die;
Steal from the world, and not a stone
Tell where I lie.

Alexander Pope

- 2 How many times should we brush our teeth a day?
- 3 What kind of water should we drink?

The word 'hygiene' means the practice of keeping ourselves clean. It also means to keep our home and work places clean. It is important for our good health.

Hygiene is thought to be next to godliness. It is because we cannot achieve anything physically, mentally or spiritually if we are unclean in our body, mind and soul. Nobody likes an unclean person either. So we must follow the rules of hygiene.

First, we must keep our body clean. We should have a bath every day and wash our hair regularly. This will keep the body and hair free from dirt and bacteria.

Secondly, we should wash our clothes regularly. Dirty clothes give off bad smell and invite germs. We should wear socks and shoes when we go out to protect our feet from dust and germs. It is also important to wash our hands before meals and after using the toilet. We should brush our teeth twice a day, after breakfast and supper. We must also cut our nails regularly. Our drinking water must be pure. We can get pure water by boiling and filtering.

Finally, we should keep our surroundings and environment clean.

If we do and follow all the above things properly, we will be able to lead a healthy and happy life.

10/E Purana Paltan

Dhaka 1000

9 June 2013

Dear Sohel

I am sorry I could not reply to your letter earlier. This is because last week there was a tragedy in our family. My father died of lung cancer.

He used to smoke heavily. He got the bad habit from his college days. Recently my mother and I were very worried about Father's worsening health condition. He was having continuous chest pain. The doctor showed him his chest X-ray plates. There were dark marks on his lungs. The doctor explained to him that the marks were the signs of lung cancer. He also explained that a poisonous substance called nicotine is in tobacco leaves; and cigarettes are made from tobacco leaves. When a person smokes cigarettes, this nicotine enters into their lungs with every puff. If anybody smokes cigarettes for years, this deadly nicotine causes lung cancer. Both mother and I tried to stop father from smoking. He never listened to our requests and warnings. He died an untimely death.

Let me tell you the truth. My father's death is a great shock for us. You know, we are a big family of seven. My father was the only earning member in the family. So we don't know how we are going to survive.

Anyway, God is merciful and we are trying to recover from the shock. Write me when you have the time. Give my regards to your parents.

A table of contents is an important part of a book. It gives us information about what is inside a book. It tells us what each of the parts of the book is about. It also tells us how to go to the page where the part starts. A table of contents is usually written as 'contents' at the top of the page. The list of the parts is presented in the order that they appear in the book. The list contains the titles or the names of the parts. It sometimes mentions the sections as well as the subsection titles with the chapter/ unit/lesson titles.

It also includes the foreword or preface, book map, index, and the page numbers.

C Ask and answer the questions.

- 1 Why do we need a table of contents in a book?
- 2 In what order are the parts of a table of contents presented, eg. lesson numbers?

D True or false? If false, give the correct information.

- 1 A table of contents gives us information only about the contents of a book.
- 2 A table of content contains some columns.
- 3 There is no link between the order of the list and that of the parts appearing in the book.
- 4 A chapter or unit title is sometimes followed by the section or subsection titles.

E Open your English textbook. Find the table of contents page.

Look at the questions. Work in pairs and find out.

- 1 What is the title of the page?
- 2 What are the column heads?
- 3 Which page numbers contain the topics?

A Look at the dictionary page in Lesson 3 and answer the following questions.

Then read the text below.

Do you use a dictionary?

Why and how often do you use a dictionary?

How can a dictionary help you?

A dictionary is a collection of words. It lists the words of a language and gives necessary information about them. It tells us about the

- a) spelling
- b) pronunciation
- c) meaning
- d) parts of speech etc. of words.

To make the meanings of words clear example sentences are given in italics.

Example sentences show how words are used.

It also gives the synonym/s and the antonym/s of a word.

We find words made by adding prefixes and suffixes to the root word. Parts of speech are also shown. A verb word is always given in the simple present tense. But the past form of a verb and the past participle are also shown.

B Again read the text above. Then ask and answer the following questions.

- 1 What information does a dictionary give us about a verb word?
- 2 Why are the example sentences given?
- 3 How are new words formed?
- 4 Why are the synonyms and the antonyms given?
- 5 What do we need a dictionary for?

C Match the sentence parts in A with those in B.

A	B
A dictionary shows	in its simple present tense.
Prefixes and suffixes	about the words of a language.
A verb word is always given	help to make new words.
Meanings of words are given	how to pronounce a word.
A dictionary gives information	in a dictionary.

Lesson 5 : Looking up words in a dictionary

A Talk in groups about the text in Lesson 4 and about the questions below. Then read the text.

- 1 Is there any connection between the alphabet and a dictionary?
- 2 What do you understand by alphabetical order?

The words in a dictionary are presented in alphabetical order. It follows the alphabetical order of letters. It means words starting with the letter D will be before the words starting with the letter E. In the same way words starting with the letter F will come after the words starting with E.

Again the words starting with the same letter are also arranged one after another in alphabetical order in the dictionary. For example, the words dark, doctor and deep all start with the letter D. These words appear in the dictionary in the order of *dark*, *deep* and *doctor*.

To find the words with a letter, look at the words at the top of the page.

While doing the activities, use a dictionary or a dictionary page as much as you can.

B Arrange the following words in alphabetical order.

entertainment, knowledge, culture, art, painting, thought, interest, heritage, yellow, future

C Work in pairs. Arrange the following words under the letter ‘S’ in alphabetical order as they appear in the dictionary.

single should system sufficient

solar source steel sweet

D Find and write the words coming between the words tea and technique under the letter ‘t’ in your dictionary.

E Show in which order are the following words arranged in Lesson 3.

Fit fitted fitful fitness fitting fitter fitment

Lesson 6 : Meanings of words

A Look at the questions below and read the following text. Now discuss in pairs

- 1 What do you do when you want to know the meaning of a word?
- 2 How can a dictionary help us?

A dictionary gives us the meaning/meanings of a word. Examples sentences are given to show how the words are used. They also help to make the meaning clear. A word may have more than one meaning.

The word dry (adj) has a number of meanings. Three of them are given here.

- (i) not wet, not damp, not sticky: *The river becomes dry during the summer.*
- (ii) with very little rain: *I hope the weather remains dry during our picnic.*

At times he would get tired in the scorching sun, but there were no trees under which he could sit and rest for a while. Thinking how people suffer in the heat, Kartik began his tree planting mission.

Kartik would wake up early in the morning, take one or two labourers with him and set out to plant trees. He would walk long distances to plant trees, carrying with him some dry food and water. He would pay all the expenses from his own pocket. Kartik has planted trees beside the roads, in and around the bazar, schools and colleges, open fields and many other places.

At times it so happened that Kartik would go to water his plants at 10 or 11 p m. People asked him, "Kartik, are you mad? What are you doing so late at night?" Kartik would smile and say, "What to do, sir. I have to work hard the whole day to earn money for my family. I don't get time during the day. But my trees would die if I don't water them. So I come late at night to look after them."

However, he shared his dinner with them. The dove was so tired that she could hardly eat. But the bat was sly. He ate greedily. He began to praise the owl with the thought of getting more food. The bat said, "O wise and brave owl, you are the most generous person I have ever seen. You are powerful and mighty."

The dove was ashamed of her friend bat and kept her eyes down. The owl urged the dove, "Come on, say something!"

- 4 Who looks very happy? Can you guess why?

B Read more about the three birds and find out about their fate. Work in pairs and write the answers to the questions that follow.

"What?" cried the bat. "Is that all you have to say to our gracious host?" Is he not the wisest, bravest and most generous of all animals and birds? Have you no praise for his noble character as well as for his goodness to us? I am ashamed of you! You do not deserve such hospitality. You do not deserve this shelter."

"You are an ungrateful bird, and the bat is right. You do not deserve this generous hospitality which I have offered. Get out! Be off, I say!"

"Yes, get lost!" echoed the bat, flapping his leathery wings. And the two heartless creatures fell upon the poor little dove and drove her out into the dark and stormy night.

But the owl and the bat did not go unpunished for their act of heartlessness. The bat can never fly in broad daylight. He has to wait for the sun to go down. And do you know what happened to the vain owl? Well, he is blind as long as the sun is up. He cannot hunt or feed himself unless it is dark. So the two vicious creatures with their dark heart live in the dark.

On the other hand, the dove is rewarded for her truthfulness. Her name shall be used by poets as long as the world lasts to rhyme with “LOVE”.

A Read and recite the poem.

The children's song

Land of our Birth, we pledge to thee
Our love and toil in the years to be;
When we are grown and take our place
As men and women of our race.

Father in Heaven, Who lovest all,
Oh help Thy children when they call;
That they may build from age to age,
An undefiled heritage.

Teach us to bear the yoke in youth,
With steadfastness and careful truth;
That, in our time, Thy Grace may give
The Truth whereby the Nations live.

Teach us to rule ourselves always,
Controlled and cleanly night and day;
That we may bring, if need arise,
No maimed and worthless sacrifice.

Teach us to look, in all our ends,
On Thee for judge, and not our friends
That we, with Thee, may walk uncowed
By fear or favour of the crowd.

Teach us the strength that cannot seek,
By deed or thought, to hurt the weak;
That, under Thee, we may possess
Man's strength to comfort man's distress.

Teach us Delight in simple things,
And Mirth that had no bitter springs;
Forgiveness free of evil done,

And Love to all men, 'neath the sun!
Land of our Birth, our faith, our pride,
For whose dear sake our fathers died
Head, heart and hand through the years to be!

Lesson 2: The Ama divers

Key words : rare descend hazardous rely

A Read the text and answer the questions.

Before the beginning of the 20th century, pearls were obtained from pearl oysters. These oysters were collected from the bottom of the ocean, lake or river.

To get enough pearl oysters, free-divers were often forced to descend to the depth of more than 100 feet in one breath. Because of the difficulty of diving, pearls at that time were of different quality as well as very rare.

In Asia some pearl oysters could be found on shoals at a depth of 5–7 feet from the surface. At times the divers had to go 40 feet or even up to 125 feet deep to find enough pearl oysters. These deep dives were extremely hazardous to the divers.

Questions

- 1 What is the text about?
- 2 Where did the people get the pearls from?

B Read about the Ama divers of Japan. Discuss in pairs the information that you have got from the text and answer the questions.

In some fishing villages along the coast of Japan, there are amazing groups of women known as ‘Ama’. These women worked and are still working as Ama. The word ‘Ama’ means ‘women of the sea or sea women’. They are independent divers. They make their living by diving. They can dive to the depth of the sea up to 25 metres. And they dive without using oxygen tanks or other breathing equipment.

The Ama divers rely on their own skills and breathing techniques. They use that skill and technique to push themselves down to the bottom of the sea and back to the surface again. They can hold their breath for up to two minutes. Careful watching, lung capacity and hunter instincts are the special qualities of Ama divers.

However some of these young villagers are going to the city for other jobs. The remaining Ama divers are now aged between 50 and 60. But there are still some who continue to dive even at their 70s. If the young people do not take up Ama diving, soon this profession will die out.

Questions

- 1 Why are the Ama divers amazing?
- 2 How deep can the Ama divers go down into the sea?
- 3 What techniques and skills do the Ama divers use in diving?
- 4 Why do you think the young villagers are going to the city?

A Look at the pictures and discuss with your partner what you see.

B Read the text and answer the following questions.

River gypsies are an ethnic group in Bangladesh. They are known as bedey to local people. The gypsies have their own lifestyle and culture. They live in groups and do not own any land. Therefore, they live a nomadic life travelling from one place to another. These people roam across our rivers and waters from May to December in small country boats. These boats are their houses and these people are a part of our waters. In winter, many water bodies dry up. At that time they return to the mainland and live in make-shift tarpaulin tents on open river banks. You can see their men relaxing in the tents. Toddlers play with dogs or other pets in the dust. Women often idle away time by hair doing, picking off lice in twos or threes sitting in a row.

Throughout the monsoon, they remain busy with fishing. They also dive for natural pearls in waters. Sometimes, they camp for a couple of weeks. Men catch snakes and entertain people with snake charming and sell herbal cures. Women go from door to door to sell bangles, cosmetics and other things. They also try to heal pains of old people often by sucking out blood from their body.

Many villagers believe in the magical power of the gypsies . They can an evil spirit leave someone's body by magic or special Powers.

- Woman : Not yet. But I've heard about mobile boat-schools in rivers. I'll try to find one for my son.

Lesson 4 : River gipsies in Bangladesh (2)

Key words : survive used to inherit mainstream petty trick integral part
community settle urbanise (v) urban (adj)

A Look at the pictures. Discuss with your partner and say who they are, where they are, what they are doing, etc.

B Read the text and answer the following questions.

River gypsies in Bangladesh are having various problems. First, Bangladesh is urbanising very rapidly. Gypsy people are losing their customers in urban population. Hence, their income is threatened. Secondly, 24,000 kilometres of previous waterways has shrunk into only 6,000 kilometres in the country in dry seasons. Scientists believe that Bangladesh will be worst affected by global climate change. The unpredictable rain and drying out of rivers have made boat movement heavily restricted. Thirdly, many river gypsies are changing their lifestyle in the context of changed reality. They are thinking of living permanently on land. The authority feels that river gypsies need help to survive in the mainstream population. Therefore, the government is offering voting rights, permanent housing and bank loan facilities. However, changes do not come overnight.

Traditionally, river gypsies are used to water life. They have inherited from their forefathers necessary life skills to survive in waters. They have no education and training to adapt to mainstream modern society. So the authority feels the need to bring them under formal education network. But they have no permanent living place. Gypsy children are born and brought up on roaming boats. Therefore, they cannot go to conventional schools. And hence, mobile boat-schools are coming up for gypsy children. Some voluntary organisations are running special schools on boats to educate river gypsy children in some areas.

Questions

- 1 What are the main problems that river gypsies are facing?
- 2 What is the effect of global climate change in Bangladesh?
- 3 Why are many river gypsies thinking of changing their lifestyle?

Computer whizz kid eyes record books

A six-year-old boy from Bangladesh is hoping to become the world's youngest computer expert.

Wasik Farhan-Roopkotha turned six in January 2012. He is hoping his skills will be recognised by Microsoft and Guinness World Records.

Wasik started to show a talent for computers since early childhood. Before the age of four, he mastered playing video games and typing in Microsoft Word.

His mother Cynthia Farhan-Risha said, "I knew he was very different since his birth. I couldn't believe my eyes when he began computing as a seven-month- old child.

At his local primary school, Wasik was above the average level. So his parents decided that he should be taught at home.

According to his mother, Wasik's English is still limited. However, he has a few words to say in Bengali.

"I really enjoy playing on the computer and learning new skills," Wasik told the BBC.

"My ambition is to be a computer expert at a big computer firm in the future."

Wasik is a computer-nerd. But he still enjoys mixing with other children, playing football and listening to music. However, computers are his main passion.

Farhan-Risha hopes that Wasik will be mentioned in Guinness World Records. They have not yet listed anyone as the youngest computer programmer in the world.

Guinness World Records said, "We do not monitor such a record in our database at the moment. But Wasik's family is welcome to make a claim on our website."(adapted from The Daily Star)

A Look at the following pictures. Discuss with your partner what you see in them.

B Read the text and answer the following questions.

'I eat rice every day. I play cricket. I don't *bunk off* school, blah...blah...blah...!' These are common events. They happen every day or on some occasions. Are these events news? Should they be published in newspapers? The answer is a big 'NO'. Then what is news anyway? What do we want to know from the media? 'When a dog bites a man that is not news, but when a man bites a dog that is news,' says Charles Anderson Dana.

The first thing is that the news should be a piece of information. Secondly, the information should be recent or new, and hence it is 'news'. Thirdly, mass people should take interest in it. Fourthly, it should be self-explained. That is, it should answer all the questions with who, which, what, where, when, why, and how. Finally, it should be objective. Recently, another aspect has been added: news is either printed or broadcast or on the internet.

There are opinions that the term 'news' comes from 'new'. Others say it is news because it comes from all directions: North, East, West and South.

Questions

- 1 What features should news have?
- 2 What is the difference between news and an event?
- 3 '.....it should be self-explained...'. What does 'it' mean here?
- 4 What are the opinions about the term 'news'?
- 5 What must be there in the information in a newspaper?

C Pairwork. Find the following words/phrases in italics in the text in B. Discuss with your partner and try to guess their meaning from the context. Then match them with their meanings in the right column. First one is done for you.

Word/phrase	meaning

media	to send out programmes on TV or radio
objective	ways of getting information e.g. Radio, TV, newspaper, etc

Lesson 1: The wheel

Key words : circular rotate axis propeller turbine mobility journey (v) vehicle invention civilisation

A Look at the pictures and say which one is easier to move and why.

B Read the text and answer the following questions.

Human beings have invented many important things so far. They have brought great civilization to the world through these inventions. Do you know which invention is the greatest? It is ‘the wheel’.

A wheel is a circular object. It can rotate around its axis and help easy movement of things across a surface.

The wheels are, in fact, everywhere. They are on our cars, trains, planes, wagons and so on. Besides, they are on most factory and farm equipment. Fans, propellers, turbines are also other types of wheels.

So the wheel is very important. We cannot imagine modern life without wheels. But do we know exactly who made the first wheel?

Questions

- 1 What is a wheel?
- 2 What can a wheel do?
- 3 Where can you find wheels?

C Fill in the blanks with appropriate words from the box. There are more words than necessary.

difficult much circular important heavy first

Although the wheel is a very (a) ----- invention, the history of its origin is unknown. Experts guess that the first wheel was developed from a circular object. The early man observed that a huge piece of stone could be rolled easily if it was (b) ----- in shape. Similarly, a heavy tree-trunk is (c) ----- to carry; but it can be rolled away with less effort. Even, a gigantic tree-trunk can be moved easily using other small and round trunks as rollers under it. Thus, early man took advantage of rolling objects and developed the (d) ----- wheel. Apart from its mechanical advantage, a wheel's mobility has contributed (e) ----- to the civilisation.

D Make as many correct sentences as you can using the substitution table. In the third column there are more items than necessary.

1. The wheel		a type of wheel.
2. A plain wheel	is	around its axis.
3. It	has	one of the simplest machines.
4. A propeller	rotates	wheels on vehicles and machines.
		helped in rapid progress of civilisation.

E Have you ever travelled by bus or car? Do you have any experience of what happens if one wheel falls flat. If yes, give a description of your experience. If no, imagine such a situation, and write a paragraph about it.

Lesson 2: The history of the wheel

Key words : invent valley ancient further pioneer warfare

A Look at the following pictures of wheels. They existed in different ages in history. Discuss with your partner and put ordinal numbers under them (in spelling, such as ‘first’, ‘second’, etc.,) beginning from the earliest to the modern times.

B Read the following dialogue between the English teacher, Mr Ramis and a student Rubina.

Mr Ramis : You know that the invention of the wheel has helped to create a new civilisation. But do you know who first used wheels?

Rubina : No teacher. But I guess it may be the Greeks.

Mr Ramis : The Greeks were pioneers in many things. But in this case, however, the Mesopotamians were the first. The oldest ever wheel was discovered in Mesopotamia. It was in 3,500 B.C.

Rubina : Where is Mesopotemia?

Mr Ramis : Well, Mesopotamia was in ancient Iraq. It was along the valley of the rivers Tigris and Euphrates. After the Mesopotamians, the wheel was further improved by the Egyptians. They first made wheels with spokes. Then they used them on chariots around 2000 BC.

Rubina : So the wheel travelled to Egypt from Mesopotamia?

Mr Ramis : Exactly. But it travelled eastwards too. Wheels reached the Indus valley by 3000 B.C. But chariots with spoked wheels were made in ancient India in around 1500 B.C. They were used for war, hunting and racing.

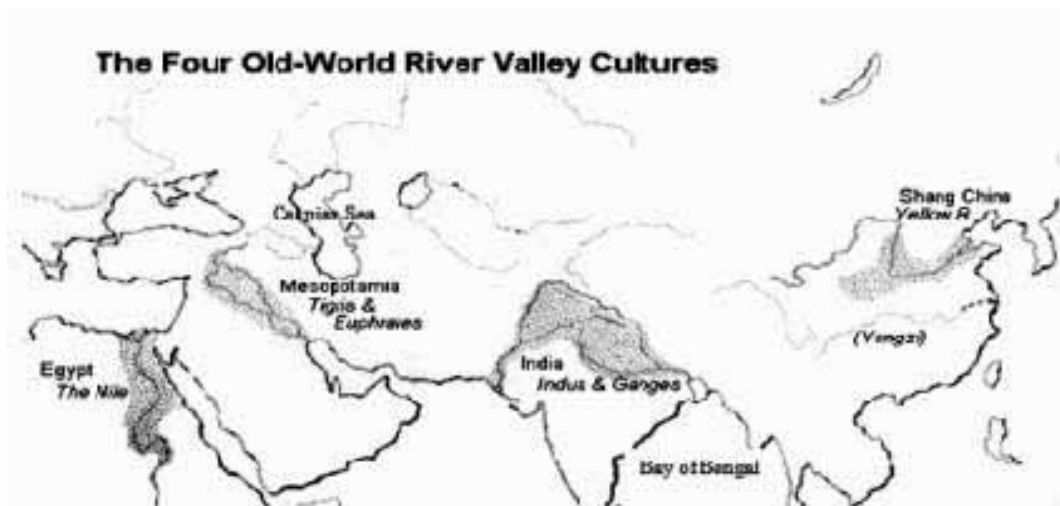

Rubina : What about the Greeks, teacher? Didn't they use wheels?

Mr Ramis : They definitely did. In 1500 BC, the Greeks too learnt the idea of wheel-making from the Egyptians. They also made further improvements on it. Later, the Romans did the same too and produced a variety of wheeled vehicles.

C Read the statements below and say whether they are true or false. If false, give the right answer.

- 1 The Greeks were the pioneers in developing spoked-wheels.
- 2 The earliest wheel was discovered in 2000 B.C.
- 3 The Egyptians first used wheels on chariots.
- 4 The Romans first used wheeled chariots for warfare.
- 5 The ancient Indians used wheels before the ancient Romans did.

Lesson 3 : The fastest wheel on Earth

Key words : high-speed record-breaking network expand conventional
unconventional magnetic trainset

A Look at the pictures of some of the fastest trains on earth and talk about them with your partner.

B Read the text and answer the following questions.**The TGV**

The TGV (*Train à Grande Vitesse*, meaning *high-speed train*) is France's high-speed rail service.

It started in the 1970s. Originally, it was powered by gas turbines. But in 1973, the TGV was changed into electric trains. The TGV service first started between Paris and Lyon in 1981. Later, the network connected other cities in France with Paris.

A TGV test train set the world record for the fastest conventional wheeled train on 3 April 2007. It reached the speed of 574.8 km/h (357.2 m/h) on the test run. But the regular TGV trains operate at the highest speed of 320 km/h (200 m/h). It is the present world record of speed of a conventional commercial train.

The Bullet Train

The Bullet Train is the network of high-speed train service in Japan. It started operation in 1964 on a limited route. But at present, most major cities of Japan come under the network.

The Bullet Train runs at a maximum speeds of 300 km/h (186 m/h). It plans to increase speeds up to 320 km/h (199 mph). In 2003, Japan set the world record for unconventional magnetic trainsets. In a test run, the speed was 581 km/h (361 mph). But it is not yet in regular commercial operation.

The High-speed Rail

The High-speed Rail service in China started operation on April 18, 2007. Currently China has started building a high-speed passenger rail network. It will be similar to French TGV or Japanese Bullet Trains. The usual top speed of China's conventional quick trains is 300 km/h (186 mph).

Recently China has set the world record of a speed of 487.3 km/h (303 mph). In 2011, this record was set by an unconventional magnetic *trainset* called the "Harmony Express". This is the highest speed of an unconventional magnetic *trainset* in regular commercial operation.

C Read the above text in section B again. Now discuss with your partner to fill in the blank slots in the following grid with the information about high-speed trains.

Name of the country	Name of the train/train network	Year of introduction/start	Top speed of conventional train	Top speed of unconventional train	Holds world record for

D Discuss in groups to decide which of the above three rail services you like best and why. Finally write a paragraph and present it in the class.

E Pair work. Read the basic information about Bangladesh Railway below. Share with your partner and write a composition using the information.

Name: Bangladesh Railway

- Headquarters: Dhaka
- Zones: Eastern and Western
- Numbers of stations: 459; number of engines: 284; number of passenger carriages: 1,245; number of wagons:1,2948
- Total length of railroad: 2,855 kilometres; passengers transported annually: 42 million; total number of employees: 34,168
- Nature of present operations: international (Dhaka-Kolkata); inter-city; local

F Work in pair. Imagine your partner is a railway official and you are a reporter. You asked questions and the official gave the above information (section E) in answers. Discuss and write what the questions might be. For example:

- 1 What is the official name of our rail service?
- 2 Where is the headquarters of Bangladesh Railway?

Now continue...

- 1?
- 2?
- 3?
- 4?
- 5?
- 6?

Lesson 4: Taking off

Key words: endeavor supersonic speed revolution aviation ads website
neither ground (v) sky's the limit

A Look at the picture and discuss with your partner what it is and where you can find it.

B Read the text and answer the following questions.

Human beings conquered the distance on earth by discovering wheels. They endeavored further. Then on December 17, 1903, the Wright brothers in America made the first experiment of flying in a plane. In the experiment, a machine carried a man and rose above by its own power. *The machine was called 'aka airplane'*. It flew naturally in a smooth speed, and finally landed without damage. That was human being's first real take-off. And now, they have got a supersonic speed. In a supersonic speed, something travels *faster* than sound! So *the sky's the limit* now!

Modern aircraft companies are making revolutions in aviation technology. Boeing as well as Airbus is producing modern passenger airplanes. These planes fly very fast. Boeing 787 flies 950 km/h. However, Airbus 350 is expected to fly in a couple of years. Its speed will be 945 km/h.

You find attractive ads on the websites of both Boeing and Airbus planes. Both have excellent features. But in speed, neither could beat the Concorde. It is the world's *fastest*

supersonic passenger aircraft. Its normal speed was 2,170 km/h. The Concorde was a joint project by France and Britain. It started passenger flight in 1976. Unfortunately, the Concorde fleet was grounded for ever in 2003 after a major accident.

Questions

- 1 Who made the first successful experiment in flying an airplane?
- 2 What was the first flying machine called?
- 3 What do you mean by ‘supersonic’?
- 4 What was world’s fastest passenger airplane?
- 5 When was Concorde fleet finally grounded?
- 6 When is Airbus 350 expected to take off?

Note: The speed of sound, which is approximately 760 miles per hour is called 1 Mach. An airplane flying less than 1 Mach or less than 760 miles per hour is traveling at a subsonic speed. Faster than 1 Mach or 760 miles per hour would be a *supersonic speed*.

D Read the dialogue between the English teacher Mr Ramis and Sohan. Then answer the following questions.

Sohan : Teacher, in the last class we read about modern aircraft. There were Boeing 787s, Airbus 350s, Concorde and so on. But which one is the best? Which one can we buy for our Biman Bangladesh Airlines?

Mr Ramis : A difficult question. There are certain things to consider. If you think of speed, Concorde flies the fastest. To many, it looks the most beautiful. But it's no more in operation.

Sohan : Between the other two aircraft?

Mr Ramis : Well, if you remember, Boeing 787 travels 950 km/h. So you see, it's not as fast as Concorde. But it's faster than Airbus 350.

Sohan : Yes teacher. I remember Airbus 350 travels 945 km/h. It's 5 km shorter than Boeing 787.

Mr Ramis : Nice calculation! But there are other factors too. Say, passenger capacity, production cost and many more. Airbus 380 now is the largest and can carry more passengers than any other aircraft. Authorities have to consider so many...

Sohan : Yes teacher. I understand.

Complete these statements using the correct form of words in the brackets.

- 1 Airbus 350 is a bit (slow) than Boeing 787.
- 2 Concorde flew the (fast) among all passenger aircrafts.
- 3 Even sound cannot travel as (fast) as Concorde.
- 4 In supersonic speeds, Concorde flies (high) in the sky than Boeing.

- 5 To many, Concorde looks (beautiful) than other passenger aircrafts.
- 6 Airbus A380 is the (large) passanger aircraft in the world now.
- 7 Airbus A380 can carry (many) passengers than Boeing 787.

E Project Work: Work in groups. Suppose, your teacher will buy a mobile hand set. Visit in pairs a nearby mobile phone shop. Make a list of different models of handset with their price and other features. Then discuss with your partner to compare and decide which one will be the best hand set and why. Share your findings with other groups.

Lesson 5: Future aircraft

Key words : withstand space base launch detach monitor hypersonic
research melting point

A Look at the pictures and say what they are. Discuss with your partner.

B Read the news report adapted from the Guardian.

The Falcon Hypersonic Technology Vehicle-2 (Falcon HTV-2) is the fastest plane ever built by human beings. It would fly from London to Sydney in less than an hour. Supersonic Concorde, by the way, could not fly at such a great speed. At the same time it would withstand temperatures of almost 2,000 degree C. This temperature is hotter than the melting point of steel.

The US Defense Agency will launch the Falcon HTV-2. First, they will set it on the back of a rocket. Then they will launch both into the space from an Air Force Base. The plan goes like this: engineers will launch the Falcon HTV-2 into the space on the back of a rocket; then they will detach the plane from the rocket; the plane Falcon will fly towards the Earth; engineers will guide and monitor it in its flight. The plane would fly in hypersonic speeds of 13,000 mp/h. This speed is about 20 times the speed of sound.

The Falcon was born in 2003. It was born as part of a US military project. The project researched and built a special type of plane. The researchers wanted that the plane could reach any part of the world in less than an hour. They also wanted to use it for any purposes, military or civil. The plane was already tested in computer models.

The Falcon Hypersonic Technology Vehicle-2 would be mankind's dream aircraft in the days to come.

Questions

- 1 What is HTV-2?
- 2 What is the speed of HTV-2?
- 3 Describe the steps of HTV-2 test flight.
- 4 Why was the HTV-2 developed?
- 5 Do you think that HTV-2 will be 'mankind's dream aircraft'? Why do you think so?

C Imagine you are a TV reporter. You have come to interview the chief engineer of the HTV-2 Launch Project. What questions will you ask him/her? Design a short dialogue between yourself and the engineer, and write it. Finally act it out in pairs.

D Listen to the teacher/CD carefully and complete the following sentences with appropriate words.

U9, L5 D Listening text: 11

- 1 Thursday's flight will test another ----- of the aircraft.
- 2 The plane is made of ----- composite materials.
- 3 The plane will fly in ----- speeds.
- 4 In the flight, the body ----- of the plane could reach 2,000 degree Celsius.
- 5 ----- will melt at 2000 degree Celsius.

E The following passage is based on the information in section B. Read the text in B again. Discuss in pairs and complete the following sentences with will/would, can/could/could not.

Even Concord ----- fly as fast as Falcon HTV-2. The news report says: the US Defense Agency ----- launch the Falcon Hypersonic Technology Vehicle-2 into space. Scientists expect that the Falcon HTV-2 ----- fly at 13,000 miles per hour. The US military wishes that the Falcon ----- bomb any part of the world in less than an hour in the future. Engineers plan that they ----- ----- set the Falcon on the back of a rocket to launch it into the distant space.

F Have you ever dreamt of flying? If yes, write about your dream.

If no, try to imagine you are flying in a plane. Write about your experience.

If you fly westward in a supersonic plane such as Concorde, you will land several hours before you took off. Can you explain how?

Lesson 6 : Paper has advanced our life

Key words : record paper surface of stone bark encyclopedia wood plunk digital

A Look at the picture and say what this is. Discuss with your partner.

B Read the text and answer the following questions.

Communication of ideas is at the centre of civilisation. It needs written records. Most of our records in the modern age are on paper. Though writing was invented very early, paper is a more modern invention.

For long in history, people transferred ideas through speaking and listening. Then there came the art of writing. But to record thoughts in writing was difficult. Writing material was not available. People used surface of stone, metal, wood, bark, leaves, etc. for writing. Those things were not easy to carry. Then for ages, people looked for easy writing materials. Finally, Paper was invented in China in 105 AD.

Before paper age, knowledge was very restricted. Can you think of that time? There were very few books in the world. Maybe, they were written on stone or on heavy wood plunks or on metal sheets. Suppose, one page was a heavy stone block. So think of a hundred page book! In our age, you can carry the entire world of knowledge in digital form in your laptop bag. You can even carry a huge volume of paper encyclopedia. But who could produce and carry tons of heavy stone books and documents in those paperless days? In fact, paper has made publication and the spread of knowledge and information easy. So you can see how paper has changed our life.

Questions:

- 1 How did people transfer ideas before writing was invented?
- 2 Why did people look for easy writing materials?
- 3 Why was knowledge very restricted in pre-paper age?
- 4 Do you think paper has changed our life? Explain why your answer is 'yes' or 'no'.
- 5 Where was paper invented and when?

C Discuss with your partner and make a list of things other than paper on which we can write in pens, pencils, markers, brushes, paint/pastels etc.**D Listen to the teacher/CD carefully and complete the following sentences.**
U9, L6 D Listening text: 12

- 1 The person who invented paper is a ----- man.
- 2 He took the bark of a mulberry tree and ----- fibers.
- 3 This knowledge of ----- was first used in China.
- 4 The word 'paper' is not ----- .
- 5 The word 'paper' was derived from a kind of Egyptian plant called -----

E Look at the following boxes first. Listen to the teacher/CD again. Then write in the boxes the series of works Ts'ai Lun' did in making paper. First one and the last one are done for you.

- 1. He took the bark of Mulberry tree and bamboo fibre.
- 2. He mixed them
- 3. He pounded
- 4. He poured the mixture
- 5. He let the water..... .
- 6. He let the thing dry.

F PROJECT WORK: On weekend, observe how *ruti* or *paratah* is made in the kitchen. Carefully take notes of each step taken to make it. Then back in class, share your notes with your partner/group. Finally write how *ruti* or *paratah* is made and make a presentation in the class.

Lesson 7: Contemplation

A Look at the picture and discuss in groups these questions:

- 1 Why is the boy up in the tree?
- 2 What is he looking at?
- 3 Guess what he is thinking about.

B Read the poem and answer the above questions.

Contemplation

For days and days I've climbed a tree
 A dappled yellow tree
 And gazed abroad at many things
 I've always wished to see.

I see the green and gentle fields
 All bounded in with hedge
 And shining rivers swimming through
 The rushes on the edge,
 And little sheep who play all day
 I watch them as they run,
 While far away the roofs of town
 Are shining in the sun.

I think it's very nice to sit
 So high and look so far----
 How very large the world can be!
 How many things there are!

John Carpenter

Note

dappled yellow tree - spotted yellow tree (the leaves may be yellow)

gazed abroad - looked around

bounded - surrounded

hedge - a thick row of bushes

swimming through - (the river like a person is swimming through) flowing through

rushes - tall plants that grow on the river's edge

C Ask and answer these questions.

- 1 Where do you think the tree was?
- 2 What were the four things the poet could see from the tree?
- 3 Have you ever climbed a tree? If yes, what did you do it for? If not, why?
